THE FACTS

STONEKOTE®-85-GREEN

CONFIDENTIALITY NOTICE: These documents contain confidential information belonging to the sender, which is legally privileged. The information is intended only for the use of the individual or entity this is being sent to. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution or the taking of any action in reliance on the contents of this information is strictly prohibited.

DESCRIPTION:

This product has a green finish, which provides a surface with very high release characteristics and a low coefficient of friction. **STONEKOTE®-85-Green** has excellent adhesion to most metals and also to glass, porcelain, etc.

USES:

The primary use of this product is as an industrial coating where a non-stick, low friction surface is needed. Abrasion resistance is good and coefficient of friction is very low. Established industrial end-uses are: carburetor parts, valve components, molds, cutting blades, etc. This product can be used in many military and non-military coating specifications.

FDA STATUS:

This product is **NOT** approved for food contact end-uses.

Guarantee of performance of applied coatings by E. L. Stone Company are neither implied nor expressed. E. L. Stone Company has no control over the myriad of possible service conditions (chemicals, temperatures, mixtures, etc.) E.L. Stone Company recommends that a test sample first be evaluated by the customer under conditions as close as possible to their intended service condition.
